

Consultant/specialist for Electronic Reporting and CBD, Output Management for D365FO

Job Title: Implementation Consultant
Organizational Location: Project Delivery Department
Direct Report To: Project and Delivery Manager
Indirect Report To: None

Do you want to help build the Nordics' most professional department within Electronic Reporting and Configurable Business Documents (CBD)?

Tabellae helps Europe's leading ERP consulting houses to implement Dynamics 365 FO and specializes in the ERP system's most important part - the external business documents. We specialize in implementing Output Management software solutions for Dynamics, and making ERP documents, such as quotations and invoices, faster to design and maintain – ultimately reducing risk, time and costs for our customers.

We are 70 Output Management specialists spread over 7 offices in Denmark, Norway, Sweden, Portugal, Germany, and the USA - and we only need you (initially 😊).

We are growing rapidly and looking to add team members to our Danish offices, Brøndby and/or Vejle.

The Job

Our new implementation consultant will assist our ERP partners with consulting assistance to build external reports from Dynamics 365FO in CBD.

You must be able to:

- understand complex business processes.
- gather requirements.
- work according to Tabellae's leading Best Practices.
- be able to communicate positively with our ERP partners and end customers.

The tasks consist of:

- Analysis of business requirements.
- Specification of detailed requirements (DDS or FDD).
- Execution and implementation of the Output Management solution, most often in international projects with several accounts and legal requirements.
- Tests and quality assurance

You will be assisted by Tabellae's architects and project managers, but a high degree of independence is required.

In addition to customer-related tasks, the right person will also have the opportunity to develop into a team lead role within the Microsoft tools Configurable Business Documents (CBD) and Electronic reporting (ER), as well as related technologies.

About You

You have a great interest in assisting the leading D365FO suppliers in delivering the best implementations with less risk, greater competence, and better results. You would also like to help build and position Tabellae within Microsoft technologies.

You also have:

- Experience and knowledge of SQL, SSRS, Electronic Reporting, or Configurable Business Documents Framework.
- Experience with ERP implementations or third-party solutions.
- Interest in being at the forefront with knowledge of the Microsoft tools for external ERP documents.
- Good communication and collaboration skills, as well as the ability to "go deep" in logic and business processes.

Life at Tabellae

We offer a challenging and exiting position in a company where customer focus, professionalism, employee satisfaction, and entrepreneurship are key values and where decisions are made quickly based on the given situation and facts at hand. Your colleagues will be locally based at our office in Denmark and in our other offices in Denmark, Sweden, Norway, Germany, Portugal, and USA.

About Tabellae

Tabellae is the ERP system's best friend and help our partners and end customers achieve success in Dynamics 365FO projects. We do this by assuming the role and responsibility for delivering the part of the project that has to do with external documents – in all graphic and electronic formats.

Tabellae is the largest and fastest growing supplier of output management solutions in the world with experience in more than 500 implementation projects. We provide our customers with solutions that provide high-quality external documents complying with requirements from their customers, suppliers, and governmental authorities.

You can see more about our customers here: <https://lnkd.in/eg7ZZnsu>

Tabellae was founded in Denmark in 2010. We have since expanded to Sweden, Norway, Portugal, Germany, and USA.
