

“We have saved a factor 1:5 by using Lasernetet”

“Lasernet is one of the best in the fields at the moment - no doubt about that”

Henrik Wochner
CIO, Ole Lynggaard A/S

About the company

Ole Lynggaard A/S is one of Scandinavia's largest manufacturers of jewelry in exclusive crafts and design. The company is appointed to the royal Danish court as a supplier. Ole Lynggaard sells jewelry in several locations around the world and has own shops in Denmark, Sweden and Australia. The company employs 120 people and uses Navision 2016.

Results

- Factor 1:5 savings compared to current ERP-partner
- Smooth upgrade of ERP-system
- Room for continuous adjustments
- Good collaboration with Tabellae
- Further optimization possibilities in future

The Danish design company Ole Lynggaard has invested in an output management solution that gives room for development and continuous adjustments to document content, looks and formats. The implementation of Lasernet has been smooth and the company has saved numerous hours investing in Lasernet once and for all.

Working with output management for almost 20 years, CIO Henrik Wochner has comprehensive experience. He knows the pros, cons and benefits that effective output management can have for a business.

Lots of upgrade changes

He explains “Over the last year we have done an upgrade of our ERP-system Microsoft Navision. Because our business has developed we had a lot of changes from the 2007 to the 2016 version”.

“In order to be able to keep developing, we needed a flexible solution that would enable us to make both large and small changes on an ongoing basis. Therefore it has been important for us to have a more standardized platform in NAV 2016”, Henrik Wochner explains.

Factor 1:5 savings

“At first we looked into doing the reports within the ERP-system but when we looked into how many hours our current partner

should spend adjusting and customizing the solution to our needs, we could see that it was a factor 1:5 we would save by doing it with Lasernet. The choice was not so difficult and needless to say we have no regrets about the choice”.

Henrik Wochner continues: “Lasernet is one of the best in the fields at the moment - no doubt about that”.

Good cooperation

“The cooperation we have with Tabellae is good. As it often is with new collaborations, you have to get to know each other; how you work and see things. It is normal when you start up”.

“Tabellae quickly allocated a project manager to the working process. The steady collaboration we have with him is quite good”.

More to come in the future

Looking back over the 6 months we have been happy with the Lasernet output management system. The handling of various documents in our upgraded ERP-system runs smoothly now, and there is potential for even for optimization with Lasernet.

“There is no doubt that the system can do much more than what we use it for right now. Therefore we look forward to taking even more advantage of the Lasernet products in the future”, Henrik Wochner ends.
