

Case  
Story

With Lasernet, we can manage output for 25 different countries and still deliver documents in the desired design and format.

*Erwin Daza*

IT Project Leader, Boehringer Ingelheim

## A worldwide Lasetnet implementation with a great track record

The Boehringer Ingelheim Lasetnet adventure is in a league of its own: Spanning multiple countries, continents and legislative demands for document formats, it truly demonstrates the strength of a large-scale Lasetnet setup with a close integration with Microsoft Dynamics AX in every way.

Erwin Daza, IT Project Leader with Boehringer Ingelheim, explains the development of the Lasetnet engagement:

"We started out with Lasetnet a few years ago, after realizing that making changes to the way your business documents look and the way you present data on them is a costly affair in the 'normal' ERP world. With Lasetnet, you can do changes to layout(s) very fast, and in our context - with so many countries, companies and demands - it is really something that matters to our business".

### Easy to do and implement changes - fast

When documents are redesigned in the organization, it is also possible to involve users, vendors and suppliers - and get to a result that lives up to the demands.

"With Lasetnet, we can present a prototype, which can be modified easily when change requests are needed by the stakeholders. We can design our document for customers, vendors, 3rd parties, etc. and decide among different delivery options in order to satisfy their needs. It is really amazing that we can use the same ERP setup worldwide - and be capable to customize all these different documents and designs for all kinds of situations with Lasetnet".

Erwin Daza also adds that their Lasetnet partner, Tabellae, has a major role in the successful implementation and current upgrade project for Boehringer Ingelheim's Lasetnet installation:

"Tabellae is a very professional software implementation partner. We get help when we need it - and just now we are looking at how to use all the exciting tools from our recent Lasetnet upgrade. A process that in other circumstances, and with our many countries and servers, would be something of a challenge. But not in this case, fortunately".

### About Boehringer Ingelheim

The Boehringer Ingelheim group is one of the world's 20 leading pharmaceutical companies. Headquartered in Ingelheim, Germany, it operates globally with 142 affiliates and more than 47,400 employees. Boehringer Ingelheim uses Microsoft Dynamics AX 2009 as their ERP system, and Lasetnet produces output for their European, Asian and American offices for 25 countries.
