

Vikan achieves massive implementation and operational savings

"I estimate that we have saved around half a million Danish kroner plus continuous savings of a few hundred thousand more each year"

Allain Bill Bøge
IT Manager, Vikan

About the company

Vikan is one of the world's leading producers of maximum hygiene cleaning implements. The company employs 225 people globally.

Tabellae provided them with an output solution for their Microsoft Dynamix AX 2012 ERP system.

Results

- One-off savings of around DKK 500,000
- Annual savings of around DKK 0.2 million in the form of fewer consultancy hours, system adaption processes and coding of reports
- Smoother, quicker and more table operations
- Implementation within agreed timeframe

Vikan bids farewell to high consultancy bills, system adaption processes and the specialised encoding of reports. Today their documentation management processes are faster, more stable and without the need for external support.

Tough times before Lasernet

Before Lاسernet was implemented, Vikan experienced high costs: "Our reports were coded in Microsoft Dynamix AX, so it was expensive to change anything. On top of that, it took a long time to carry out any changes, and it was difficult to know what was being done, because there were so many consultants involved," explains Allain Bill Bøge, IT manager at Vikan. When Vikan decided to improve its document management system, many recommended Lاسernet as the most effective solution. Now their system works better, more quickly and is more stable.

More applications

"We save a lot of money just by being able to correct mistakes and functions ourselves. We use Lاسernet primarily for document management, but we are considering using it to produce tags/labels in the future," explains Allain.

No more waiting for consultants

"Being able to take care of our day-to-day operations ourselves has been crucial. It's very liberating to know that we don't need to wait on any consultants to come in and

make changes. We just get on with it ourselves! "Lاسernet works well on a daily basis. And what really characterises the solution is that it works at all times. We don't have any need for external support, and we don't have any problems changing or restarting things. It all just works well".

Saving of DKK 500,000 plus annual savings of DKK 200,000

"The financial advantages of switching to Lاسernet have been huge. I estimate that we've saved in the order of half a million Danish kroner. On top of that, we're seeing continuous savings of a few hundred thousand more each year."

Implemented on time

Regarding the implementation of Lاسernet, Allain says, "We met our goal on time, and there's no doubt that the implementation process was a success. We struggled to generate the right data a little at the start, which was frustrating. But looking back on the process as a whole, I can say that it went really well."

Tabellae thinks in terms of solutions and follows up

Allain is particularly pleased with Tabellae's co-operation: "They've been great at following up on things, which in itself is a great quality. Tabellae is persevering, trustworthy and solution-orientated. Many suppliers fail to meet deadlines. Tabellae is absolutely not that kind of supplier."
