

# All incoming invoices and orders are handled smartly using Lasernetet by Tabellae

*"Support is always available and competence levels are high".*

**Carsten Lund Sørensen**  
CFO, Bagger Sørensen & Co. A/S

## About the company

Bagger-Sørensen and Co. A/S is a holding and investment company that previously owned Fertin Pharma and Dandy.

The company handles approximately 4,000 documents per year. The ERP system is Microsoft Dynamics 365. Bagger-Sørensen uses Lasetnet Input Management as a stand-alone solution.

## Results

- 95% of incoming invoices are no longer processed manually
- Better and easier invoice handling
- Good cooperation with Tabellae
- Quick support
- High level of competence

**When, in 2017, Bagger-Sørensen sold a large part of the company, they went from being 600 employees in one large organisation to being approximately 50, organised in a great number of sister companies. The company's new setup had high demands in terms of ERP system and input solution.**

The former ERP system had been designed for production within the pharmaceutical industry. There was a need for a fresh start, and the company therefore looked at standard solutions, where the functionality had been tried and tested from the start. The eventual recommendation was a Dynamics 365 solution with Lasetnet Input Management.

## Good cooperation

During the implementation process, Tabellae customised the setup to the company that Bagger-Sørensen is today. Tabellae were responsible for the basic setup, including the 'masks' that define which areas of an invoice are to be read. Afterwards, employees were trained to use the system, giving them maximum flexibility in everyday life. "It's so user friendly, which makes it very easy for us", says Carsten Lund Sørensen, and continues: "Our cooperation with Tabellae had an educational effect, meaning that employees can now index documents correctly for the first time.

## Competent service and local support

"When, from time to time, we need support, Tabellae is always available. We get the help

we need straight away, and we cannot fault the service at all. We also find that the staff at Tabellae are highly competent. In popular terms, you don't get the feeling that it's their 'first day on the job'. You can get that impression from other providers."

## Savings in processes and time

CFO Carsten Lund Sørensen says that the Lasetnet solution has made the entire process of invoice handling much easier and virtually eliminated manual handling of invoices. Previously, vendor invoices were sent to one common email address. Today, the invoices are sent to the company to which they belong. This has also made it clearer which subsidiary company the company's suppliers are dealing with.

## A good business case

Bagger-Sørensen also uses the Lasetnet solution for outgoing free text invoices and delivery notes, because the standard D365 layout is not very readable and does not meet the requirements of the Danish Bookkeeping Act without adjustments being made. With Lasetnet it is easier to adjust the layout and meet the requirements for invoices.

"As CFO, it is attractive in a business case that Lasetnet is not paid for according to the amount of use. We can continue to develop but our subscription price will stay the same, regardless of the number of invoices we create per year," Carsten Lund Sørensen concludes.
